

Hi, I'm a designer.

Driven by problem solving, I build products which empower people and grow businesses.

5 years of experience

I worked for 7 different companies, including start-ups with less than 10 employees.

65+ projects

I designed dozens of projects, in various industries: health, insurance, technology, bank, education, e-commerce, travel...

20+ hackathons

I teamed up with lots of developers and won 11 prizes, including 5 first place.

My tools

Design

Sketch, Adobe suite (Ai, Ps, Id), Invision, MarvelApp, PopApp, MindMeister, OptimalWorkshop, Typeform, SurveyMonkey, DropboxPaper, WhatUsersDo...

Code

HTML, Pug, Haml, CSS, Stylus, JavaScript, JQuery, Atom, GitHub...

My skills

Although I initially specialized in **user interface** and **visual design**, I can cover the full user experience process including **user research** and **information architecture**. I am fond of **code** and love to produce my designs.
